Task:01

Portfolio Website Design

You are building a personal portfolio website to showcase your

work.

Requirements:

• Create sections for About Me, Projects, and Contact.

• Use AI to:

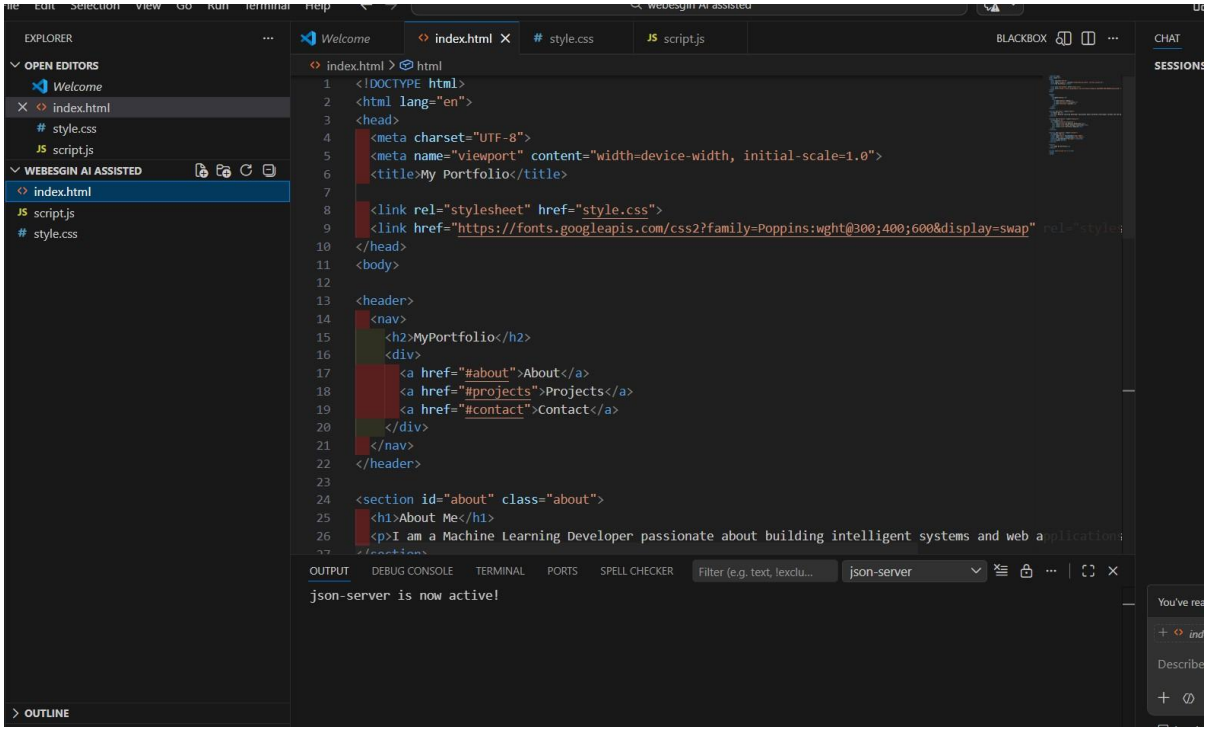
o Suggest color palettes and typography.

o Create a responsive layout with Grid/Flexbox.

o Add smooth scrolling navigation.

Prompt: I want to develop a frontend for the my portfolio

Code:



Welcome | index.html | style.css | script.js | BLACKBOX

style.css > { } @media (max-width:768px)

```css
* {
  padding: 0;
  box-sizing: border-box;
  font-family: 'Poppins', sans-serif;
}

body {
  background: linear-gradient(135deg, #0f2027, #203a43, #2c5364);
  color: white;
  scroll-behavior: smooth;
}

/* Navbar */
header {
  position: fixed;
  width: 100%;
  top: 0;
  background: rgba(0,0,0,0.6);
  backdrop-filter: blur(10px);
  z-index: 1000;
}

nav {
  display: flex;
  justify-content: space-between;
  padding: 15px 40px;
}
```

OUTPUT | DEBUG CONSOLE | TERMINAL | PORTS | SPELL CHECKER | Filter (e.g. text, !exclu... | json-server

```
json-server is now active!
```

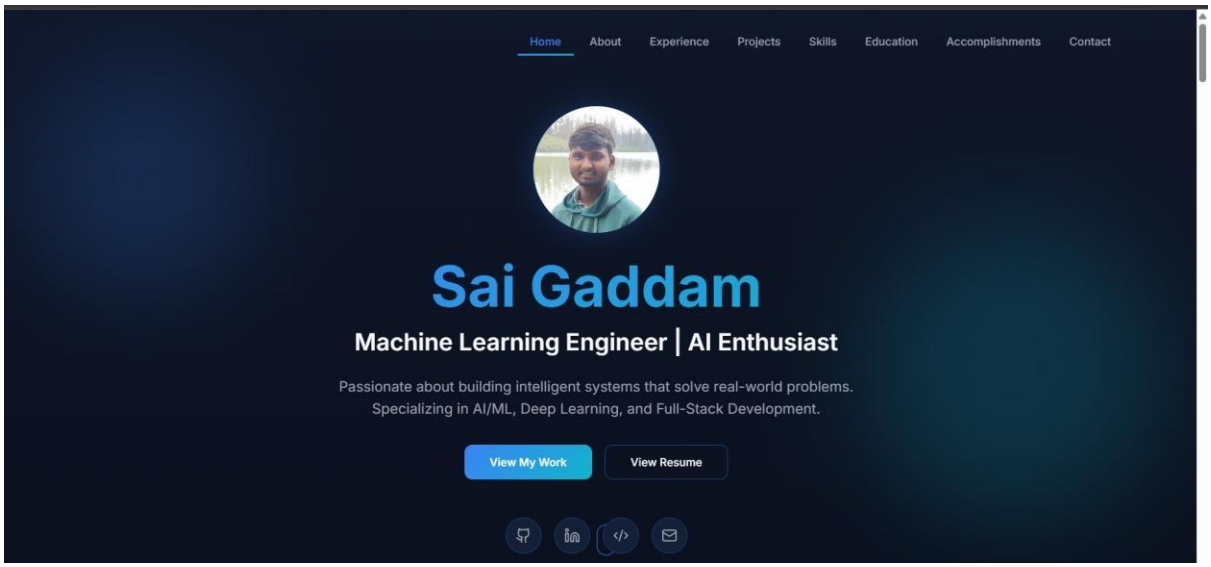
script.js > ...

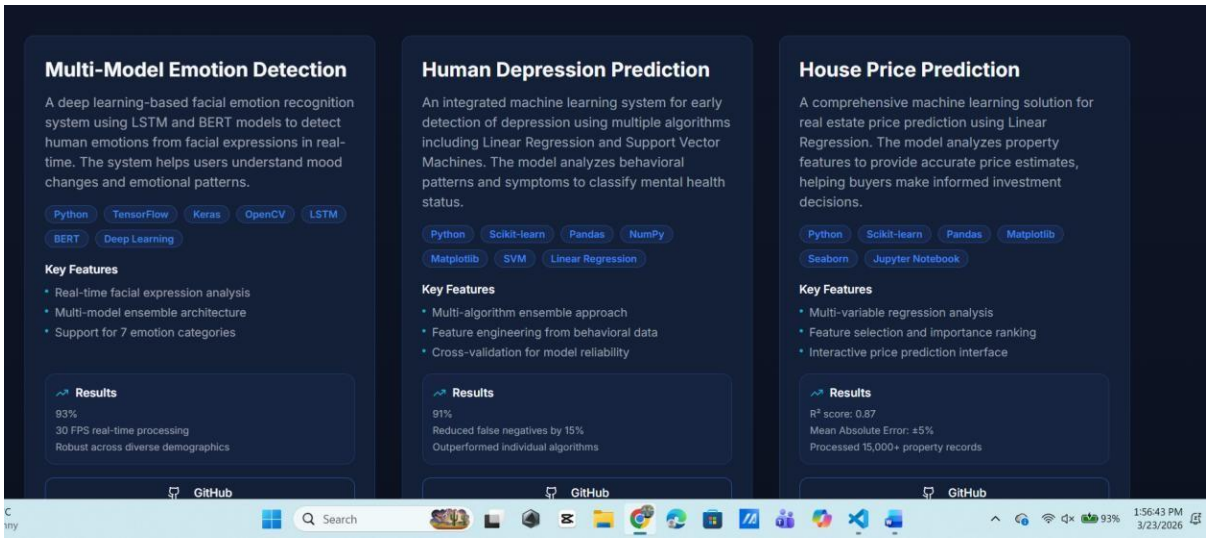
```javascript
// Scroll animation
const sections = document.querySelectorAll('.about, .projects, .contact');

window.addEventListener('scroll', () => {
  sections.forEach(sec => {
    const rect = sec.getBoundingClientRect();
    if(rect.top < window.innerHeight - 100){
      sec.classList.add('show');
    }
  });
});

// Smooth scroll
document.querySelectorAll('nav a').forEach(anchor => {
  anchor.addEventListener('click', function(e) {
    e.preventDefault();
    document.querySelector(this.getAttribute('href')).scrollIntoView({
      behavior: 'smooth'
    });
  });
```

Output:





Observation:

The portfolio website was successfully developed using **HTML, CSS, and JavaScript** with the help of AI-assisted design techniques. The structure of the website includes three main sections: **About Me, Projects, and Contact**, ensuring a clean and organized layout

Task:02

Task 2 – Online Store Product Page

Design a product display page for an online store.

Requirements:

• Display product image, title, price, and "Add to Cart" button.

• Use AI to:

o Style with BEM methodology.

o Make layout responsive.

o Add hover effects and "Add to Cart" alert.

Prompt:for this task create e-commerce website using html css js

Code:

index1.html > html

```html
<!DOCTYPE html>
<html lang="en">
<head>
<meta charset="UTF-8">
<meta name="viewport" content="width=device-width, initial-scale=1.0">
<title>E-Commerce Product</title>

<link href="https://fonts.googleapis.com/css2?family=Poppins:wght@300;400;600&display=swap" re

<style>
* {
  margin:0;
  padding:0;
  box-sizing:border-box;
  font-family:'Poppins',sans-serif;
}

body {
  background: linear-gradient(135deg,#141e30,#243b55);
  color:#fff;
}

/* Navbar */
.nav {
  display:flex;
  justify-content:space-between;
```

  justify-content:space-between;
  padding:20px 40px;
  background:rgba(0,0,0,0.6);
}

.nav__logo {
  font-size:1.5rem;
  font-weight:600;
}

.nav__cart {
  position:relative;
  cursor:pointer;
}

.nav__cart-count {
  position:absolute;
  top:-10px;
  right:-10px;
  background:red;
  border-radius:50%;
  padding:5px 8px;
  font-size:12px;
}

/* Layout */
.product {
```

```html
<html lang="en">
<body>
<div class="product fade-in">

  <!-- Images -->
  <div class="product__images">
    <img id="mainImg" src="https://via.placeholder.com/500" class="product__main-img">

    <div class="product__thumbs">
      <img src="https://via.placeholder.com/500" onclick="changeImg(this)">
      <img src="https://via.placeholder.com/500/ff0000" onclick="changeImg(this)">
      <img src="https://via.placeholder.com/500/00ff00" onclick="changeImg(this)">
    </div>
  </div>

  <!-- Details -->
  <div class="product__details">
    <h1 class="product__title">Smart Sneakers</h1>
    <p class="product__price">₹1999</p>

    <div class="product__rating">
      ⭐⭐⭐⭐☆
    </div>

    <p>High-quality sneakers with smart comfort and stylish design.</p>

    <br>

    <button class="product__btn" onclick="addToCart()">Add to Cart</button>
  </div>

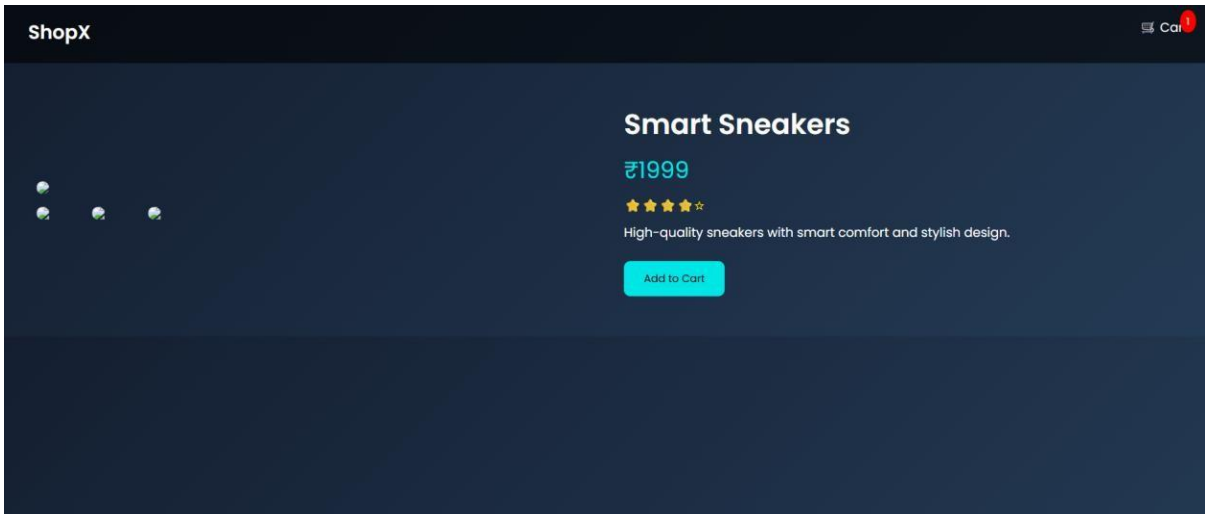
</div>
```

OUTPUT DEBUG CONSOLE TERMINAL PORTS SPELL CHECKER Filter (e.g. text, !exclu... json-server

```
json-server is now active!
```

enerate Commit Message Start JSON Server Ln 210, Col 8 Spaces: 4 UTF-8 CRLF { } HT

Output:



Observation:

The online store product page was successfully designed and developed using **HTML, CSS, and JavaScript**, following modern web design practices. The page displays essential product details such as **product image, title, price, rating, and an "Add to Cart" button**, ensuring a complete e-commerce experience.

Task:03

ask 3 – Event Registration Form

Build an event registration form for a conference.

Requirements:

• Collect name, email, phone number, and session selection.

• Use AI to:

o Add form validation with JavaScript.

o Make the form accessible with labels and ARIA.

o Style with a professional look.

Prompt:create event management system using HTML CSS JS

Code:

task3.html > html

```html
<!DOCTYPE html>
<html lang="en">
<head>
<meta charset="UTF-8">
<meta name="viewport" content="width=device-width, initial-scale=1.0">
<title>Event Registration</title>

<link href="https://fonts.googleapis.com/css2?family=Poppins:wght@300;400;600&display=swap" re

<style>
* {
  margin:0;
  padding:0;
  box-sizing:border-box;
  font-family:'Poppins',sans-serif;
}

body {
  height:100vh;
  display:flex;
  justify-content:center;
  align-items:center;
  background:linear-gradient(135deg,#667eea,#764ba2);
}

/* Form Card */
.form {
  background:rgba(255,255,255,0.1);
  backdrop-filter:blur(15px);
  padding:40px;
  border-radius:20px;
  width:90%;
  max-width:450px;
```

OUTPUT DEBUG CONSOLE TERMINAL PORTS SPELL CHECKER Filter (e.g. text, !exclu... json-server

```css
@keyframes fadeIn {
  from {opacity:0; transform:translateY(40px);}
  to {opacity:1; transform:translateY(0);}
}

.form__title {
  text-align:center;
  margin-bottom:20px;
}

/* Input Group */
.form__group {
  position:relative;
  margin-bottom:20px;
}

.form__input {
  width:100%;
  padding:12px;
  border:none;
  border-radius:8px;
  outline:none;
}

.form__label {
  position:absolute;
  top:50%;
  left:12px;
```

```html
<body>
<form class="form" id="form" aria-labelledby="formTitle">
  <h2 class="form__title" id="formTitle">Event Registration</h2>

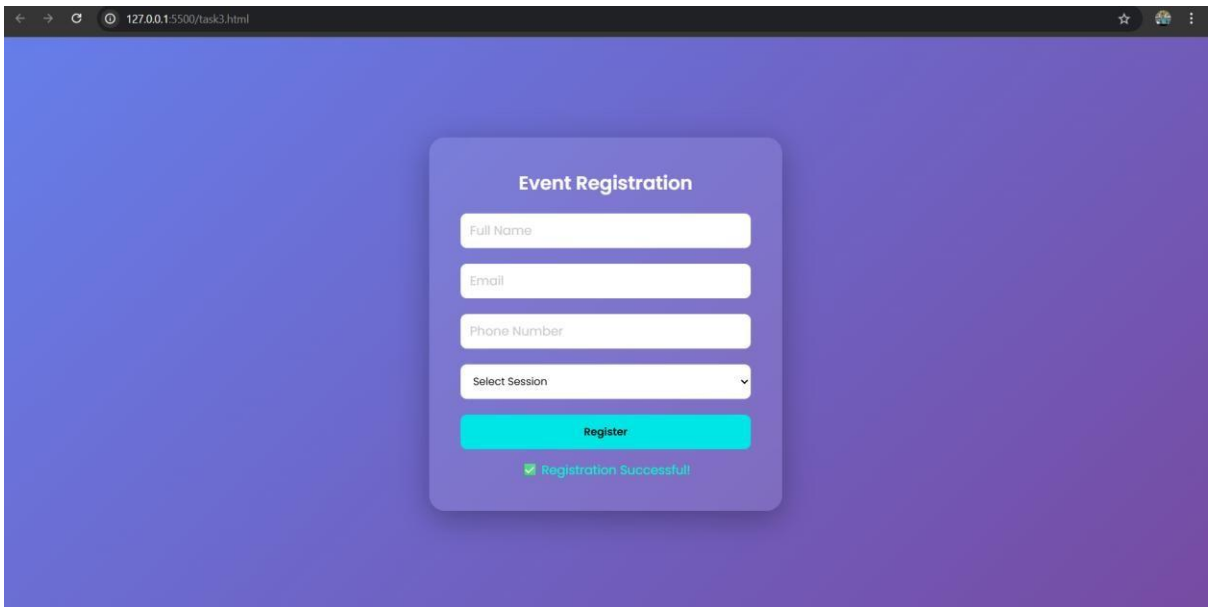
  <!-- Name -->
  <div class="form__group">
    <input type="text" id="name" class="form__input" required aria-required="true">
    <label for="name" class="form__label">Full Name</label>
    <div class="error" id="nameError"></div>
  </div>

  <!-- Email -->
  <div class="form__group">
    <input type="email" id="email" class="form__input" required aria-required="true">
    <label for="email" class="form__label">Email</label>
    <div class="error" id="emailError"></div>
  </div>

  <!-- Phone -->
  <div class="form__group">
    <input type="tel" id="phone" class="form__input" required aria-required="true">
    <label for="phone" class="form__label">Phone Number</label>
    <div class="error" id="phoneError"></div>
  </div>

  <!-- Session -->
  <div class="form__group">
    <select id="session" class="form__select" aria-label="Select session">
      <option value="">Select Session</option>
      <option>AI & Machine Learning</option>
      <option>Web Development</option>
      <option>Cyber Security</option>
```

Output:



Observation:

The event registration form was successfully designed and developed using **HTML, CSS, and JavaScript**, incorporating modern UI design principles and accessibility standards. The form collects essential user information including

name, email, phone number, and session selection, ensuring a complete registration workflow.

Task:04

Task 4 – Resume Website

Build a one-page online resume.

Requirements:

• Sections: Profile Summary, Skills, Education, Experience.

• Use AI to:

o Propose professional typography styles.

o Align sections using CSS Grid.

o Add smooth scroll navigation between sections.

Prompt:

Create a website for the resume bulding

Code:

task4.html > html

```html
<!DOCTYPE html>
<html lang="en">
<head>
<meta charset="UTF-8">
<meta name="viewport" content="width=device-width, initial-scale=1.0">
<title>My Resume</title>

<!-- Professional Typography -->
<link href="https://fonts.googleapis.com/css2?family=Playfair+Display:wght@500&family=Inter:wg

<style>
*{
  margin:0;
  padding:0;
  box-sizing:border-box;
}

body{
  font-family:'Inter',sans-serif;
  scroll-behavior:smooth;
  background:#0f172a;
  color:#e2e8f0;
}

/* Navbar */
.nav{
  position:fixed;
  width:100%;
  top:0;
  background:rgba(0,0,0,0.6);
  backdrop-filter:blur(10px);
  padding:15px 40px;
  display:flex;
```

```
<style>
h1{
  font-size:2.5rem;
  margin-bottom:20px;
}

p, li{
  line-height:1.6;
}

/* Cards */
.card{
  background:rgba(255,255,255,0.05);
  padding:25px;
  border-radius:15px;
  transition:0.4s;
}

.card:hover{
  transform:translateY(-10px);
  box-shadow:0 10px 30px rgba(0,0,0,0.4);
}

/* Skills */
.skills span{
  display:inline-block;
  background:#38bdf8;
  color:black;
  padding:8px 12px;
  margin:5px;
  border-radius:20px;
```

TPUT DEBUG CONSOLE TERMINAL PORTS SPELL CHECKER Filter (e.g. text, !exclu... json-server

on-server is now active!

```html
<!-- Navbar -->
<div class="nav">
  <div>MyResume</div>
  <div>
    <a href="#profile">Profile</a>
    <a href="#skills">Skills</a>
    <a href="#education">Education</a>
    <a href="#experience">Experience</a>
  </div>
</div>

<!-- Profile -->
<section id="profile" class="section fade">
  <div class="container">
    <div class="card">
      <h1>Profile Summary</h1>
      <p>Motivated Machine Learning Developer with experience in building intelligent systems,
    </div>
  </div>
</section>

<!-- Skills -->
<section id="skills" class="section fade">
  <div class="container">
    <div class="card">
      <h1>Skills</h1>
```

4

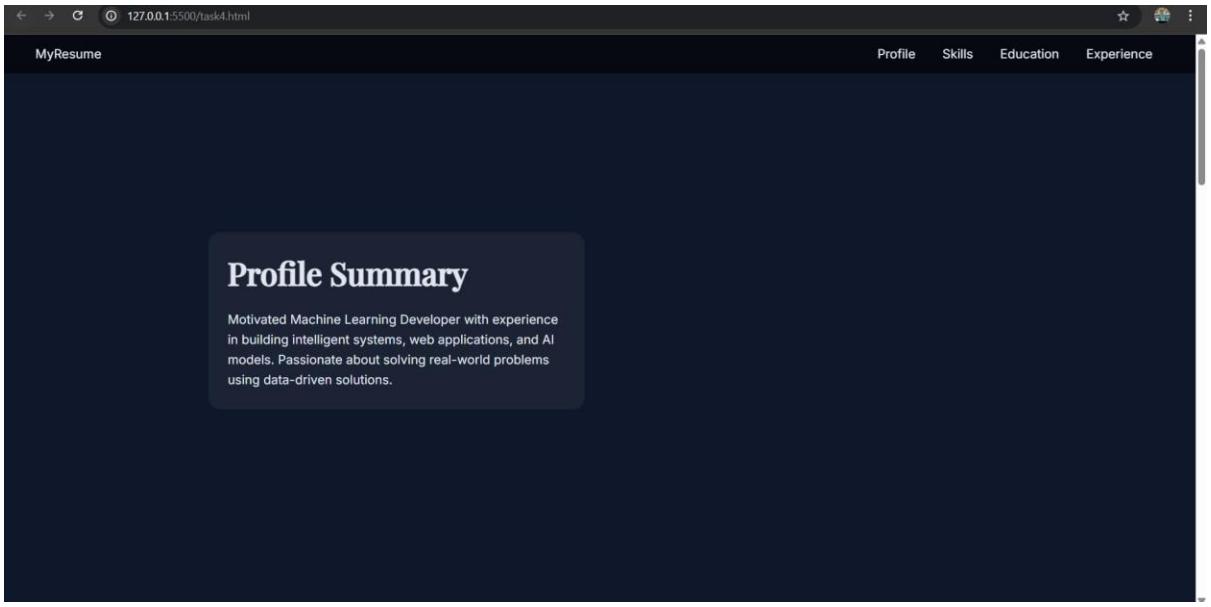
```html
<body>
<section id="education" class="section fade">
</section>

<!-- Experience -->
<section id="experience" class="section fade">
  <div class="container">
    <div class="card">
      <h1>Experience</h1>
      <ul>
        <li>Intern – AI Developer (2025)</li>
        <li>Worked on Emotion Detection & Web Projects</li>
      </ul>
    </div>
  </div>
</section>

<script>
// Scroll animation
const sections = document.querySelectorAll('.fade');

window.addEventListener('scroll', () => {
  sections.forEach(sec => {
    const rect = sec.getBoundingClientRect();
    if(rect.top < window.innerHeight - 100){
      sec.classList.add('show');
    }
  });
});
```

Output:



Observation: The one-page resume website was successfully designed and developed using **HTML, CSS, and JavaScript**, following modern web design and user interface principles. The website includes essential sections such as **Profile Summary, Skills, Education, and Experience**, providing a structured and comprehensive overview of personal and professional information.

Task:05

Task 5 – Restaurant Menu Page

Design a digital menu page for a restaurant.

Requirements:

• Display menu items with name, description, and price.

• Use AI to:

o Suggest a food-friendly color palette.

o Design a responsive card-based layout.

o Add hover effects on menu items.

Prompt:create web application for my requirements with more relastic animation

Code:

task05.html > html

```html
<html lang="en">
<body>
<div class="menu">
  <div class="menu__card">
  </div>

  <div class="menu__card">
    <h2 class="menu__title">Biryani</h2>
    <p class="menu__desc">Aromatic rice with rich spices.</p>
    <p class="menu__price">₹299</p>
  </div>

  <div class="menu__card">
    <h2 class="menu__title">Ice Cream</h2>
    <p class="menu__desc">Sweet and refreshing dessert.</p>
    <p class="menu__price">₹99</p>
  </div>

  <div class="menu__card">
    <h2 class="menu__title">Mocktail</h2>
    <p class="menu__desc">Cool and fruity beverage.</p>
    <p class="menu__price">₹149</p>
  </div>

</div>

</body>
</html>
```

```
}

/* Header */
